Exterior Standard Detailing

As paint is exposed to the environment and wear-and-tear, it can begin to appear dull or hazy, with swirl marks, water spots, and scratches lowering gloss. Once we free the paint of contaminants with our Express Detailing wash, we polish the painted surfaces, not to correct the paint, but to add gloss.

Large SUVs, Trucks, & Van: \$399

Exterior Plus Car Detailing

If you're looking for more than just an increase in gloss and would like to reduce the number of swirls and light scratches. Our Exterior Plus will do just that. We use a 1 step corrective polish process to remove many of the fine scratches, swirls and defects. We bring out the shine and protect the finish.

Maintenance Services

Winter/Deep Storage Package

We've developed a package to ensure your vehicle is ready to go after a long period of deep storage. We advise this for vehicles that will sit and not be driven for two or more months.

Your vehicle is brought up to operating temperature with a fuel stabilizer added to ensure that all the fuel in the vehicle's system has the stabilizer additive. This ensures that the fuel won't break down and become saturated with moisture. Tire pressures are increased to 50psi to prevent flat spots and cracking. Coolant concentration is checked to ensure optimum performance. Brake fluid level is checked and tested to ensure there's no moisture in the system. We lastly check your CCA (cold cranking amps) and the current health of your battery. This process is reversed once you're ready to take your vehicle out of a deep storage state.
